

**For immediate release: March 2<sup>nd</sup> 2010.**

## **GERRASPINE A.G. RECERTIFIED**

**Gerraspine AG** today announced that the Company's CE certification was renewed for another 3 years.

Mr. Horace Hale, c.e.o. and major shareholder of **Gerraspine AG** stated; "This represents an important confirmation of our commitment to quality and dedication to our quest to bring to the field of spine surgery a device that will restore function with a resultant long term effect. We are confident that our technology, the **FENIX™ Facet implant** will be the preferred option for a long term solution to the problem of providing "Normal", pain free motion to the human Functional Spine Unit".

**Gerraspine AG** is now in the process of a European market launch and expects to be fully integrated in 4 of the largest markets for spinal implants in Europe, by the end of the 3<sup>rd</sup> quarter of 2010 .

Our implant has been developed to provide a motion preserving alternative to spinal fusion, for patients suffering from chronic low back pain due to facet disease. The system resurfaces diseased facet anatomy, thereby, allowing the surgeon to alleviate pain while restoring physiological motion and stability to the lumbar spine. Our implant is suitable for use as a stand alone implant or with any artificial disc or disc nucleus replacement implant.

**Gerraspine AG** is a Swiss registered Corporation dedicated to providing the specialist spine surgeon with the means to restore normal mobility and pain free function to the spine, with a resultant long term effect.
